ALL AVAILABLE SERVICES

The Comodo consulting approach follows a proven flexible methodology. The key to success is designing an implementation to fit your infrastructure, staff availability, staff and experience, operational practices and corporate goals.

- 1 Guided Implementations**
Experienced consultants, mentors, and instructors for end-to-end setup
- 2 Advanced Implementations**
Adapt to proven IT and security methods with our cyber expertise
- 3 As Needed Consultants**
Create self-sustaining experience and expertise with our consultations
- 4 Product Health Tips**
Experienced consultants, mentors, and instructors for end-to-end setup

GUIDED IMPLEMENTATIONS

Your experienced team benefits from our programmatic approach to implementing security solutions.

Comodo provides project management and consulting to ensure that the implementation meets customer needs in a timely and efficient manner.

Your staff will learn from our training programs and our consultative approach to assure uneventful ongoing operations and administration of your Comodo implementation.

ADVANCED IMPLEMENTATIONS

Comodo works with your team to provide project management and experienced consultants to deliver custom implementation plans and tasks.

Sample projects include: deploying to new OS platforms, third party replacements, assessing operations, integrating Comodo's best practices into your operations, providing specific tuning and configuration for complex environments.

Our goal: efficient and timely completion of our consulting projects in your complex and dynamic enterprise.

AS NEEDED CONSULTATIONS

Take the uncertainty out of maintenance notifications and prompts. Comodo will provide your IT staff the people to proactively communicate, perform and maintain your cyber security.

As the security industry and threat perspective continuously evolves, so do your needs. Administrators change configurations and update software, inadvertently exposing themselves to malware.

Request our Pro Serv experts to resolve issues as they are needed.

PRODUCT HEALTH CHECKS

Organizations, applications, infrastructure, operations – they're always changing. The security industry and threat perspective continuously evolves. Administrators change configurations and update software, inadvertently exposing themselves to malware.

The Health Check includes assessing configurations, suggesting ongoing updates and adjustments, ensuring our 100% protection is operating at its optimum level. A cybersecurity Health Check today will protect your organization from tomorrow's threats.

ABOUT US

Xcitium, formerly known as Comodo Security Solutions, is used by more than 3,000 organizational customers & partners around the globe. Founded with one simple goal – to put an end to cyber breaches. Xcitium’s patented ‘ZeroDwell’ technology uses Kernel API Virtualization to isolate and remove threats like zero-day malware & ransomware before they cause any damage. ZeroDwell is the cornerstone of Xcitium’s endpoint suite which includes ZeroDwell Containment, endpoint detection & response (EDR), managed detection & response (MDR) and managed XDR (M[X]DR). Since inception, Xcitium has a zero breach track record when fully configured.
